

August 2, 2023

Dear Candidate,

Thank you for your interest in the training programs at Arnot Ogden Medical Center. We have a proud heritage of training excellent physicians by supportive faculty and trainees, and we hope you will consider us strongly.

In January of 2023 we were informed by the ACGME that the institution was placed on Probationary Accreditation status. We have subsequently learned that this is not uncommon and many institutions have faced this challenge and recovered in the past. We have been informed what the concerns were in the form of citations, and have been working towards a successful reevaluation visit this Fall and subsequent improvement of our accreditation status soon.

Each of our individual training programs continues to be accredited. When you train at Arnot Ogden Medical Center you should graduate from an accredited program with the skills necessary to be a capable and caring physician.

We are committed to our patients and your education. Please don't hesitate to contact us with any questions.

Warmly,

Michael Witt, MD, MPH, FACEP, FAAP, CPXP
Designated Institutional Official
Core Faculty, Emergency Medicine Residency & Transitional Year Program
